commenter_subject: FCM proposal Re guaranteed introducing brokers

commenter_frdate; commenter_frpage:

commenter_comments: As a long time participant in the futures industry i think the proposal to ammend the current CFTC 1-FR, Part B RE Guarantee agreements should not be approved. Our industry suffers from too much public skepticsm as it is. This would simply undermine market integrety and create an undue potential hardship on the final customer. Futures industry clients need all the protection they can get. FCMs that cant take the financial heat should cut back on the number of marginal ibs they have as an internal issue. Tim Daven
